Objekta® PREMIUM – Objekta 16® duvet

The hollow, spiral crimped fibres of the Briwafill® filling are siliconised and woven together into a durable fabric. On the one hand, this achieves a high bulk which ensures good thermal insulation. On the other, siliconisation prevents the fibres from clumping together after washing, thus ensuring durable sleeping comfort properties for the duvet.

The soft, visually attractive fabric is very hard-wearing, easy to care for and durable. It is even suitable for the demanding standards of laundering in an industrial laundry.

DUVET	155 x 220	1900 g	72544

*Other sizes available upon request

OBJEKTA 16®
Duvet
Stitching schematic diagram

The stitching on a duvet prevents the filling material from moving inside the duvet, thus ensuring even warmth over the whole surface.
