Objekta® CLASSIC – POLYKOCH® duvet

Thermofill® hollow fibre, specially developed for institutional requirements, is very hard-wearing and durable. The robust fabric is perfectly adapted to frequent washing, even in industrial laundries.

Thanks to the high polyester content, the special blended fabric is particularly easy to care for and hard-wearing. This fabric is as robust as Thermofill® hollow fibre and exceptionally durable.

POLYKOCH® duvet

Stitching schematic diagram

The stitching on a duvet prevents the filling material from moving inside the duvet, thus ensuring even warmth over the whole surface.
