**Objekta® SPECIALITY PRODUCTS –**  
**“TWO-IN-ONE” Medi-Deck duvet**

Thermofill® hollow fibre, specially developed for institutional requirements, is very hard-wearing and durable. The robust fabric is perfectly adapted to frequent washing, even in industrial laundries.

The striped fabric with its high level of colour fastness was designed for the “Medi-Deck” duvet. Using this duvet avoids needing to use additional bedding. The duvet is visually attractive and can be laundered in a hot wash. The high cotton content has a hygroscopic effect, which means that it ensures optimum absorption of body fluids.

**“TWO IN ONE”**  
**Medi-Deck duvet**  
*Stitching schematic diagram*

The stitching on a duvet prevents the filling material from moving inside the duvet, thus ensuring even warmth over the whole surface.
