Objekta® SPECIALITY PRODUCTS – TYPE 2000 FH® pillows

Fire-resistant as per BS EN ISO 12952-1 and 12952-2

Evenly cut, fire-resistant polyurethane rods give this pillow its extraordinary resilience. The evenly cut rods ensure that the filling material doesn't clump if used properly.

The material meets the strictest safety standards required for fire-resistant fabric. The fire resistance is permanent and is not affected by numerous washing cycles.

Objekta® SPECIALITY PRODUCTS – TYPE 2000 FH® pillows

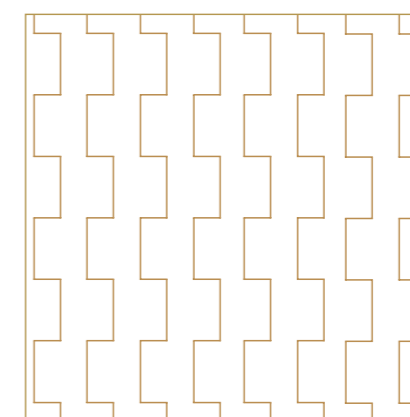

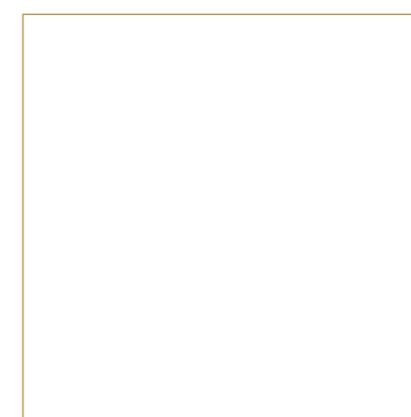

Casing **Non-quilted pillow:** Robust percale fabric made from 100 % Trevira CS®, 100% polyester

TYPE 2000 FH® QUILTED PILLOWS

Stitching schematic diagram

A non-quilted pillow casing allows a greater experience of the comfort and resting properties of the pillow filling.

A quilted pillow casing ensures the pillow's surface has an even appearance. The high tear-resistance of quilted pillow casings further increases the life of the pillow.
