## PREMIUM mattresses – PREMIUM HOSPITALITY KS

**Cold foam mattress, total height: approx. 22 cm**

The PREMIUM Hospitality KS mattress is a high-quality, 7-zone comfort foam mattress with outstanding resting qualities and provides optimum support for the spine. The double-sided, patented, cold foam Rhombo-therm® pad ensures point elasticity to mould to the contour of the body. Thanks to the special ventilation channels, this mattress provides very good moisture wicking, thus ensuring a healthy and dry sleeping environment. The mattress casing is made with a 4-sided zip. The casing is detachable, so the top and underside can also be washed separately.

## PREMIUM mattresses – PREMIUM HOSPITALITY KS

- Core** approx. 20 cm high core made from comfort foam with elaborate 7-zone lamella cut technique, with high-quality Rhombo-therm® cold foam (density 50) pad on both sides

### COLD FOAM MATTRESSES

Cold foam mattresses are generally very flexible and have high point elasticity. A common criterion to judge their quality is their density. As a general rule, the higher the density, the more durable and higher quality the cold foam used.
