## BASIC comfort foam topper – MATTRESS PAD

**Total height: approx. 6 cm**

The Basic topper provides increased resting comfort and adjusts well to the body. The core material of the topper is made from comfort foam, characterised by good breathability and ventilation.

The topper's microfibre casing is lightly quilted and each corner is fitted with a rubber strap to secure the topper on the mattress.

## BASIC comfort foam topper – MATTRESS PAD

**Casing** Microfibre fabric (100% polyester) quilted with climate fibre (100% polyester), incl. 4 rubber straps, one at each corner

**Core** Comfort foam core, density 24

**Total height** approx. 6 cm

A topper is a mattress pad that helps increase the resting comfort of the mattress by providing greater softness. Its use also lifts the total height of the bed or resting surface. In addition, a topper protects the mattress, thus contributing to its care. As a topper is usually significantly thinner and lighter than a mattress and the sheets can be removed from it separately, it makes changing elasticated sheets easier.
