Objekta® SPECIALITY PRODUCTS – Briwatherm TERRY flat pillows

The hollow, spiral crimped fibres of the Briwafill® filling are siliconised and woven together into a durable fabric. On the one hand, this achieves a high bulk which ensures good thermal insulation. On the other, siliconisation prevents the fibres from clumping together after washing, thus ensuring durable sleeping comfort properties for the duvet.

The casing is double-sided. The terry cloth side has a high cotton content with good moisture absorption and wicking. The reverse, made from blended fabric, is very snug and breathable.

Objekta® SPECIALITY PRODUCTS – Briwatherm TERRY flat pillows

BRIWATHERM TERRY
Pillow

Stitching schematic diagram

A quilted pillow casing gives the pillow's surface an even appearance and keeps the pillow snug over time. The high tear-resistance of quilted pillow casings further increases the life of the pillow.
